

WELCOME TO FLEXIBLE DROP

Quality, nationwide drop capacity across primary, backup, and spot—all from Convoy.

The first drop-and-hook service of its kind

In 2017, Convoy Go became the first drop service to let carriers of all sizes, including owner-operators, haul power only loads. This unique, modern approach to drop provides flexible, nationwide capacity beyond what traditional drop-and-hook programs offer.

Nationwide coverage

Get flexible nationwide drop capacity, even during unexpected surges, from one provider. Convoy Go provides thousands of trailers with a network of tens of thousands of power-only carriers, ready to haul at a moment's notice.

Quality, reliable capacity

Get asset-level quality from Convoy's network of drivers, vetted in real time, against rigorous safety standards. The result? A 16% lower crash rate than the industry, with 99.99% of loads delivered without a cargo claim.

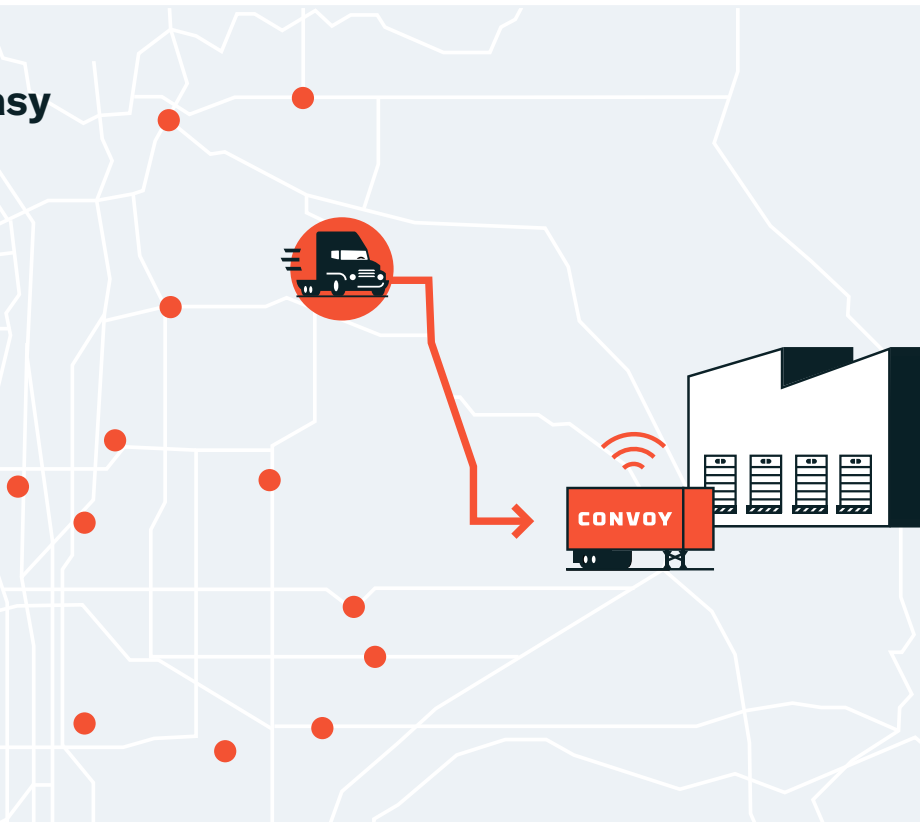

Unmatched visibility

Track the location and status of every load with Convoy's pool of smart trailers, so you never have to wonder where your freight is. Receive daily yard management reports and insights to improve facility performance and save money.

Using Convoy Go is fast and easy

1. Book your primary, backup, and spot drop freight with Convoy, and we'll send empty trailers to your yard ahead of schedule.
2. Load the trailers on your own time, without having to accommodate waiting drivers. The smart trailers notify Convoy when it's time for pickup, then drivers from our digital freight network arrive to haul the trailers to their destinations, nationwide.
2. Track your drop freight with GPS on those smart trailers, plus get a granular view of the trailers parked at your facilities through daily yard reports.

Get started

Convoy Go is available nationwide across primary, backup, and spot for any shipper.
