

CONVOY

DEDICATED ON DEMAND

Asset-like dedication. Only better.

Convoy Dedicated On Demand provides the fastest and most flexible way to secure dedicated capacity, with the cost and service reliability of a traditional asset carrier.

Ultimate flexibility

Dedicate your most consistent freight and cover surges, tackle short-term projects, or supplement your private fleet by adding power units to haul your trailer fleet.

Faster dedication

Get the reliable, quality capacity you expect from dedication, only faster. Dedicated On Demand gives you a fleet in just days, not weeks.

Reliable service

Get reliable and consistent service from the same carriers each week. In fact, shippers typically see the same carriers 90% of the time, reducing operational variances.

Cost stability

Maintain cost stability and move your freight for less. And because Convoy's network can flex to meet your needs, you won't have to pay more on the spot market when your demand surges.

“
Convoy is absolutely killing it. Their dedicated work has been above expectations. They were able to move double the volume of our previous provider without issue.”

– Transportation Director
